Prerequisites for this Workshop

This course is open to anyone who would like to learn more about how to handle digital images, beyond the camera. There are no prerequisites for this workshop just a willingness to learn.

Workshop Description

This workshop is a beginning level computer skills training workshop. Students should already know how to operate their computer. In this workshop we will discuss many topics pertinent to digital photography. With digital cameras, our new negative is the digital file. This new form of capture requires that you develop a few new skills. You will learn how to back-up, organize, and preserve all the images and memories that you have captured with your digital camera.

Teaching Methods

Students will learn the software through step-by-step instruction & on-site demonstrations. Below is a general outline we will follow in this course.

Topics Covered in Computer Skills for Digital Photography

Downloading from Media Card or CD/DVD

Burning a Back-up CD/DVD

Storing Images Long Term

Organizing Your Images

Understanding Digital Image Size and Resolution

Resizing Your Images
